INVESTIGATION REPORT (IR) GUIDELINES

SCHOOL OF COMPUTING (SOC) & SCHOOL OF TECHNOLOGY (SOT)
2023

IR REPORT WRITING GUIDELINES (SOC & SOT)

COVER PAGE

Please follow the correct format for the cover page that has been prepared. You may find it in the designated folder that has been prepared by your respective FYP managers.

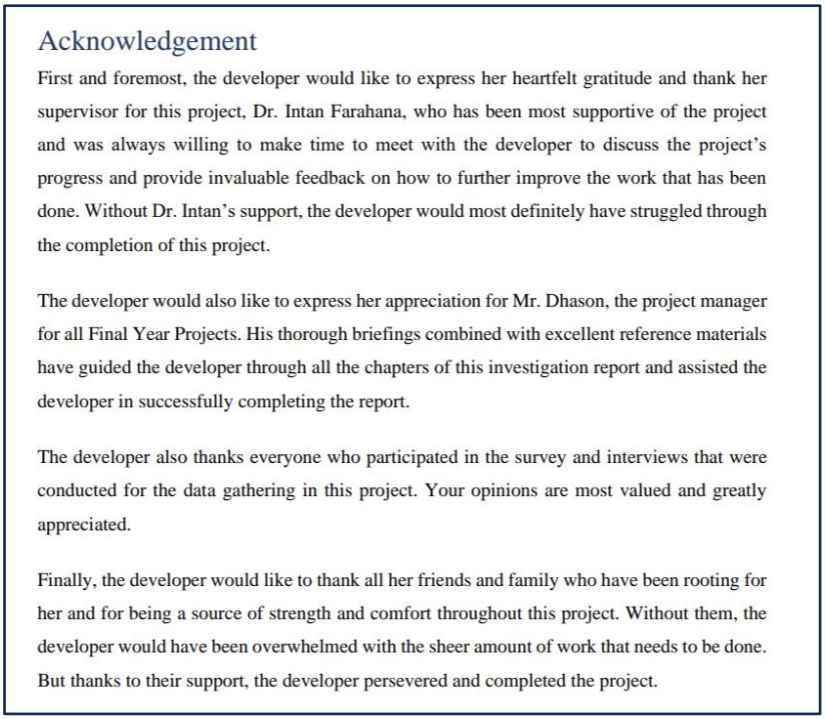

- If you are doing a dual degree program, kindly ensure you include the DMU logo on the cover page. Otherwise, it will be affecting your mark.
- DMU logo is on the left side, and APU Logo is on the right side.
- If the DMU Logo is not needed, ensure the APU Logo remains on the right side.

Notes for the Final Year Project Title:

- The number of words should be no more than 15 words.
- Please ensure that the students lock down their FYP titles at the IR stage and there should not be any changes of titles in their actual FYP itself.
- Please also make sure the titles chosen to have the proper action verbs. While titles should be concise and informative, it should also be informative enough to convey the main focus of the study. It should avoid using abbreviations.
- Do not include abbreviation/acronym (must provide full name).
- Do not include special characters : ; - ? ! , . /
- Try to limit max 15 words in your FYP Title.
- Write your FYP title with capitalized each word except conjunction words.
- The project title should at least contain an action verb – Investigating, Exploring, Confirming, Designing, Developing, Defining, Identifying, Establishing – so on and so forth.
- The title should describe the project area, outcomes, solutions, what the student has achieved or discovered, and the methodology used.
- The project title should NOT contain the product name, game name, system name or model name. There is no point in doing that.
- The project title should NOT contain an abbreviation or acronym without its full name.
- It should NOT be something like – A Car Park Management System. It should be something like **An Artificial Intelligence (AI) Enabled System to Reduce the City Centre Parking Problems During Peak Hours**.
- It should NOT be something like – Xuria – A Rogue-Like Game. It should be something like **Exploring the Effects of Diminishing Gameplay Core Loop Systems to Create Engaging Player Experience in Platform Games**.

ACKNOWLEDGEMENT PAGE

This section is written in one page to acknowledge gratitude to contributing persons/parties.

Acknowledgement

First and foremost, the developer would like to express her heartfelt gratitude and thank her supervisor for this project, Dr. Intan Farahana, who has been most supportive of the project and was always willing to make time to meet with the developer to discuss the project's progress and provide invaluable feedback on how to further improve the work that has been done. Without Dr. Intan's support, the developer would most definitely have struggled through the completion of this project.

The developer would also like to express her appreciation for Mr. Dhason, the project manager for all Final Year Projects. His thorough briefings combined with excellent reference materials have guided the developer through all the chapters of this investigation report and assisted the developer in successfully completing the report.

The developer also thanks everyone who participated in the survey and interviews that were conducted for the data gathering in this project. Your opinions are most valued and greatly appreciated.

Finally, the developer would like to thank all her friends and family who have been rooting for her and for being a source of strength and comfort throughout this project. Without them, the developer would have been overwhelmed with the sheer amount of work that needs to be done. But thanks to their support, the developer persevered and completed the project.

Figure 1: Acknowledgement Sample

ABSTRACT PAGE

An abstract section is a one-paragraph summary of a research project. An abstract may contain the following information:

- The purpose of the project **identifying the area of study** to which it belongs.
- The **research problem** that motivates the project.
- The **methods used** to address this research problem, document, or evidence analyzed.
- The conclusion reached or, if the research is in progress, what the preliminary result of the investigation suggests. – **expected outcome**
- The **significance of the project**.
- What are the mapping SDG components that can be related to the project? Explain briefly.
- Maximum 6 keywords to be included at the bottom of the abstract.
- Note that the **word limit is *200 - 250 words*.**

Abstract

Malaysians are at risk of being overweight and obese and the government has acted on this issue by applying several soft and hard policies, however, the result is yet to be known. This study is carried out to predict obesity risk through Body Mass Index (BMI), physical characteristics, lifestyle, and exercise habits for adolescents. Over 800 primary data were collected and went through a preprocessing phase. Naïve Bayes, K-Nearest Neighbors, and Multilayer Perceptron techniques used to build prediction models. The results show that the Naïve Bayes classifier outperformed with an accuracy of 96.67%.

Keywords **— Body Mass Index (BMI), Obesity, Machine Learning, Naïve Bayes, K-Nearest Neighbors, Multilayer Perceptron**

Figure 1: Abstract Sample

TABLE OF CONTENTS

Students may refer to the whole structure written in this guideline to arrange the table of contents.

LIST OF FIGURES

Figures include diagrams, photographs, screenshots, graphs, charts, code snippets, etc. Includes the title of all figures and the page number where the figure can be found in the text.

LIST OF TABLES

Includes the title of all tables and the page number where the table can be found in the text.

Important notes:

Cover page, Acknowledgment page, Abstract page, Table of Contents page, List of Figures page, and List of Table page – each of them must be started on a new fresh page.

MAIN CHAPTERS

CHAPTER 1: INTRODUCTION

Chapter 1 of the report is important since it describes the overall project and its outcome. As this is the first chapter that the evaluators will read, it is essential to make a good first impression. It is important to write a chapter that clearly explains the project's flow. A thorough understanding of the groundwork is necessary to write a well-written chapter. Table 1 shows the outline of Chapter 1.

CHAPTER 1
INTRODUCTION

1.1 Introduction

- Assume that readers have little knowledge about your project topic/domain/field.
- Relate your project introduction to the selected SDG goal.

1.2 Problem Background

- Example: Explain why current technology T is underperforming environment Z.
- Relate your project problems to the selected SDG goal.

1.3 Project Aim

- A single sentence/statement.
- Explaining the key target of the project.
- Example: To develop a system X using technology Y to be employed in environment Z.

1.4 Objectives

- A **minimum of three objectives** and a **maximum of four**.
- Must be measurable
- Start your objective with 'To…'
- Construct between 3 – 4 objectives only.

1.5 Scope

- Describe in detail the tasks to be executed.
- Constraints regarding any part of the project development (e.g., size of system and technology).
- What will and will not be done as part of the project?
- Describe the targeted users who will use your system, model deployment, etc.

1.6 Potential Benefits

- Tangible benefits
- Intangible benefits

1.7 Overview of the IR

Describe the structure of your IR report

1.8 Project Plan

Include all project tasks and sub-tasks for FYP Semester 1.

Table 1: Outline of Chapter 1

Project plan sample:

Name of Tasks	Duration	Start Date	End date	Status
Project Proposal Form	2 Days	23 March 2022	25 March 2022	Completed
Project Specification Form	7 Days	26 March 2022	03 April 2022	Completed
Chapter 1	7 Days	05 April 2022	12 April 2022	Completed
1.1 Background of the project	<1 Day	05 April 2022	05 April 2022	Completed
1.2 Problem Context	<1 Day	06 April 2022	06 April 2022	Completed
1.3 Rationale	<1 Day	07 April 2022	07 April 2022	Completed
1.4 Potential Benefits	<1 Day	08 April 2022	08 April 2022	Completed
1.5 Target Users	<1 Day	09 April 2022	09 April 2022	Completed
1.6 Scope & Objectives	<1 Day	10 April 2022	10 April 2022	Completed
1.7 Overview of this report	<1 Day	11 April 2022	11 April 2022	Completed
1.8 Project Plan	<1 Day	12 April 2022	12 April 2022	Completed
Chapter 2	6 Days	12 April 2022	18 April 2022	Completed
2.1 Introduction	<1 Day	12 April 2022	12 April 2022	Completed
2.2 Domain Research	3 Days	13 April 2022	16 April 2022	Completed
2.3 Similar Systems	<1 Day	17 April 2022	17 April 2022	Completed
2.4 Summary	<1 Day	18 April 2022	18 April 2022	Completed
Chapter 3	4 Days	19 April 2022	23 April 2022	Completed
3.1 Programming Languages	<1 Day	19 April 2022	19 April 2022	Completed
3.2 IDE	<1 Day	20 April 2022	20 April 2022	Completed
3.3 Libraries and Tools	<1 Day	21 April 2022	21 April 2022	Completed
3.4 DBMS	<1 Day	22 April 2022	22 April 2022	Completed
3.5 Operating System	<1 Day	23 April 2022	23 April 2022	Completed
3.6 Summary	< 1 Day	23 April 2022	23 April 2022	Completed
Chapter 4	2 Days	24 April 2022	26 April 2022	Completed
4.1 Methodology Selection	<1 Day	25 April 2022	25 April 2022	Completed
4.2 Justification	<1 Day	26 April 2022	26 April 2022	Completed
4.3 Implementation	<1 Day	26 April 2022	26 April 2022	Completed
Chapter 5	1 Day	27 April 2022	28 April 2022	Completed
5.1 Introduction	< 1Day	27 April 2022	27 April 2022	Completed
5.2 Design	< 1Day	28 April 2022	28 April 2022	Completed
5.3 Summary	< 1Day	28 April 2022	28 April 2022	Completed
Chapter 6	1 Day	13 May 2022	13 May 2022	Completed

CHAPTER 2: LITERATURE REVIEW

In Chapter 2, all the results and findings of the review of the literature are presented. The literature review provides a sound basis for a good problem formulation and planning of the project. From the literature review, students will be able to build a basic understanding of the project. Table 2.1 shows the outline of Chapter 2 of the report.

CHAPTER 2
LITERATURE REVIEW

2.1 Introduction

Describe the chapter introduction such as what contents you will cover/discuss in this chapter.

2.2. Domain Research

- Study of the domain from general to specific.
- Study of Related theories/technology/algorithms that can contribute towards solving the problems and others.
- Every sub-topic within the domain must have a review
- Ensure you review and discuss in detail how your project domain can achieve the selected SDG goal.

2.3 Similar Systems/ Works

- Characteristics of similar systems/ works
- Strength and weakness
- Review and discuss in detail are these similar systems/works were able to achieve the selected SDG goal.
- Conclusion

2.4 Technical Research

Describe technical requirement analysis:

2.4.1. Identify the hardware/software for the project and justify
2.4.2. IDE (Interactive Development Environment) chosen – (this section is optional)
2.4.3. Libraries chosen / Tools chosen – (this section is optional)
2.4.4. Database Management System chosen – (this section is optional)
2.4.5. Operating System chosen
2.4.6. Web Server chosen – (this section is optional)
2.4.7. Web browser chosen – (this section is optional)

2.5 Summary

Describe the chapter summary such as what you have discussed in this chapter, etc.

Table 2: Outline of Chapter 2

CHAPTER 3: METHODOLOGY

The methodology describes the overall approach and framework chosen for research and system development. The content for the methodology chapter of the report can hold methods, techniques, or approach that is used or will be used during the design and implementation of the project.

In addition, this chapter also justifies the choice of methods or approaches, as well as hardware and software requirements. It must be noted that the primary objective is not to explain the functions of each phase but rather the process that goes on within. Table 3.1 shows the outline of Chapter 3 of the report. This outline must be followed, although slight modifications that enhance understanding of the project are accepted.

For CS and CSAI students:

CHAPTER 3
METHODOLOGY

3.1 Introduction

Describe the chapter introduction such as what contents you will cover/discuss in this chapter.

3.2 System Development Methodology

3.2.1 Introduction of methodology
3.2.2 Methodology choice and justification
3.2.3 Describe the activities and process in each phase toward the chosen methodology (traditional or modern) in detail.

Notes:

- methodologies for system development such as RUP, Waterfall, V-Model, Extreme Programming, etc.
- CS and CSAI students who are developing a system with data analytics features may combine a methodology for system development with a methodology for Data Analytics. Ensure you discuss this with your supervisor.

3.3 Data Gathering Design

Describe the data gathering techniques choose for the project, choose either one:

- Surveys
- Interview
- Document analysis
- Observation
- Other relevant techniques

- Design the questions/event /activities based on the selected data-gathering technique and get verification from the supervisor, through the **ethic forms**.
- Minimum number or participant to be used:
  - Survey = 30 participants
  - Interview = 3 participants
- Note that this data gathering activities need to be conducted with the identified target audience and not with your friends.
- Data gathering aimed to help you identify system requirements, or to collect any data/information related to your project. Including potential system functionalities, potential upgrades/enhancements that the end users wishes to see in the new system.
- Note that respondent demographic information is needed to be included in the appendix

3.4 Analysis

- Analysis results towards the data retrieved from the data gathering activities.
- Final list of user requirement summarized from the analysis.

3.5 Summary

Describe the chapter summary such as what you have discussed in this chapter, etc.

Table 3: Outline of Chapter 3 for CS and CSAI student

For CSDA students:

CSDA students are not mandatory to conduct surveys or interviews. However, CSDA students are required to perform data collection (may use open dataset sourced from Kaggle, etc), data understanding, and data pre-processing.

CHAPTER 3
METHODOLOGY

3.1 Introduction

Describe the chapter introduction such as what contents you will cover/discuss in this chapter.

3.2 Methodology

3.2.1 Introduction of methodology
3.2.2. Methodology choice and justifications.
3.2.3 Describe the phases, activities, techniques, and processes in each phase Towards the chosen Methodology.
Note: methodology selection for data analysis such as CRISP-DM, KDD, Or SEMMA

3.3 Data Collection

- Data Collection – identify your dataset explain the source of your dataset and provide the dataset source link.

3.4 Initial Data Pre-processing and Data Understanding

3.4.1 Data Pre-processing

Perform all data pre-processing steps for your dataset with any preferred tools (such as Jupyter, Google Colab, etc).

- Missing Values
- Outliers
- Data Transformation
- Data Standardization
- Data Normalization
- Etc – add any other necessary sections for your 'data pre-processing' phase.

3.4.2 Data Understanding

Perform all data understanding steps for your dataset with any preferred tools (such as Jupyter, Google Colab, etc)

- Variables – explain variables in your dataset
- Observations – explain observations in your dataset
- Histogram – create histograms or any other visualizations to understand further your dataset.
- Etc – add any other necessary sections for your 'data understanding' phase.

3.5 Summary

Describe the chapter summary such as what you have discussed in this chapter, etc.

Table 3a: Outline of Chapter 3 (for CSDA students)

CHAPTER 4: CONCLUSION

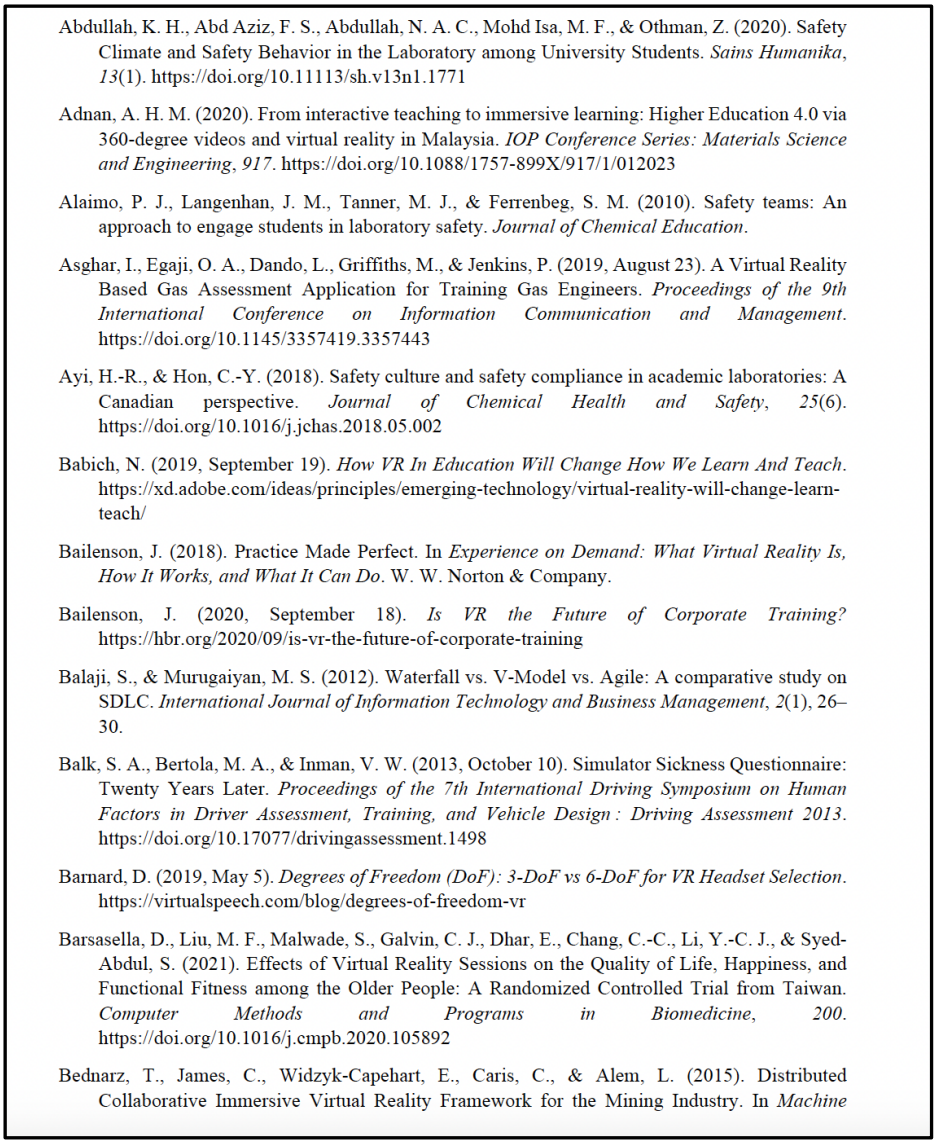

This chapter focuses on the concluding remarks of the first part of the Project.

CHAPTER 4 CONCLUSION
4.1 Discuss the achievement of the first part of the project **4.2** Justify were the student able to do enough investigation/ research concerning what to achieve for the project. Ensure relate your investigations results with the selected SDG goal. **4.3** Justify if there are any gaps in the research and design areas that the student may want to further explore and improve.

Table 4: Outline of Chapter 4

REFERENCES

References are a detailed description of items from which information was obtained in preparing the project report. Every data, information, quotation, figure, table, or anything taken from another source must be cited in the report. Citation must be done within the report and also in the reference list at the end of the report. References shall come from sources such as journals, articles, and books. References from the internet (i.e., citations from websites) are not encouraged. Students must you the **APA style** for the references (refer to Figure 1).

APPENDICES

Appendices provide supporting materials that will strengthen the explanation and review of the project. Following is the appendices' structure that must be followed.:

- Appendix A: PPF
  - Students need to include the screenshots of PPF (all pages) submitted earlier during the title registration inside the report.

1. Office Record	2. Receipt
Date Received: Received by whom:	Student name: Student number: Received by: Date:

DRAFT PROJECT PROPOSAL FORM

Proposal ID:

Supervisor: Mr. Amad Arshad - amad.arshad@apu.edu.my, Dr. Yazeerudeen Hameed - yazeer@apu.edu.my, Mr. Raheem Mafas - raheem@apu.edu.my, Dr. Intan Farahana Kamsin - intan.farahana@apu.edu.my, Mr. Hanum Mohayed - hanum@apu.edu.my

Student Name : MISS REBECCA LEE HUI YI

Student No : TP054429

Email Address : tp054429@mail.apu.edu.my & leebecky06@gmail.com

Programme Name : Computer Science specializing in Intelligent Systems (CSIS)

Title of project : Livrodzic: An OCR Driven Approach to Personal Book Catalogue Application

Please record which module(s) your topic is related to:

Mobile App Engineering (CT124-3-2-MAE)
Text Analytics and Sentiment Analysis (CT107-3-3-TXSA)
Image Processing, Computer Vision and Pattern Recognition (CT036-3-3-IPPR)

1. Introduction

Assume the reader has very little knowledge of the subject. Introduce the topic, the sector of business/industry concerned and how the project relates to it. Define the context of the problem and identify the research required to solve it.

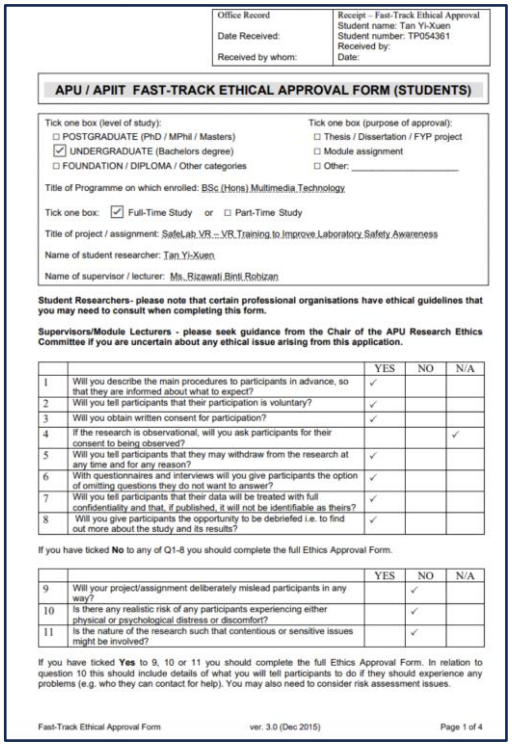

Have you ever had the urge to read a book but cannot remember where you placed it? Or saw an interesting book at the bookstore but you are not sure if you already own it? According to a study conducted by researchers from the Australian National University and University of Nevada in 2018, the average Singaporean household owns at least 52 books whilst Estonia topped the chart at 218 books on average per household (Zhou, 2018). That is more books than is feasible for the human brain to remember at a time. Hence, there is an actual and growing need for book catalogues in a home environment.

A book catalogue is (traditionally) a printed listing of all books available in the library with details such as its title, author, genre and location in the library. The catalogue was crucial in allowing

- Appendix B: Ethics Forms (Fast Track / Full Track)
  - Students need to include screenshots of the ethics form (all pages) submitted earlier in Moodle for the use of acquiring approval for the data-gathering design that needs to be included in the report.

Office Record	Receipt – Fast-Track Ethical Approval
Date Received:	Student name: Tan Yi-Xuen
Received by whom:	Student number: TP054361
	Received by:
	Date:

APU / APIIT FAST-TRACK ETHICAL APPROVAL FORM (STUDENTS)

Tick one box (level of study):
- ☐ POSTGRADUATE (PhD / MPhil / Masters)
- ☑ UNDERGRADUATE (Bachelors degree)
- ☐ FOUNDATION / DIPLOMA / Other categories

Tick one box (purpose of approval):
- ☐ Thesis / Dissertation / FYP project
- ☐ Module assignment
- ☐ Other: _____

Title of Programme on which enrolled: BSc (Hons) Multimedia Technology

Tick one box: ☑ Full-Time Study or ☐ Part-Time Study

Title of project / assignment: SafeLab VR – VR Training to Improve Laboratory Safety Awareness

Name of student researcher: Tan Yi-Xuen

Name of supervisor / lecturer: Ms. Rizawati Binti Robizan

Student Researchers- please note that certain professional organisations have ethical guidelines that you may need to consult when completing this form.

Supervisors/Module Lecturers - please seek guidance from the Chair of the APU Research Ethics Committee if you are uncertain about any ethical issue arising from this application.

		YES	NO	N/A
1	Will you describe the main procedures to participants in advance, so that they are informed about what to expect?	✓		
2	Will you tell participants that their participation is voluntary?	✓		
3	Will you obtain written consent for participation?	✓		
4	If the research is observational, will you ask participants for their consent to being observed?			✓
5	Will you tell participants that they may withdraw from the research at any time and for any reason?	✓		
6	With questionnaires and interviews will you give participants the option of omitting questions they do not want to answer?	✓		
7	Will you tell participants that their data will be treated with full confidentiality and that, if published, it will not be identifiable as theirs?	✓		
8	Will you give participants the opportunity to be debriefed i.e. to find out more about the study and its results?	✓		

If you have ticked **No** to any of Q1-8 you should complete the full Ethics Approval Form.

		YES	NO	N/A
9	Will your project/assignment deliberately mislead participants in any way?		✓	
10	Is there any realistic risk of any participants experiencing either physical or psychological distress or discomfort?		✓	
11	Is the nature of the research such that contentious or sensitive issues might be involved?		✓	

If you have ticked **Yes** to 9, 10 or 11 you should complete the full Ethics Approval Form. In relation to question 10 this should include details of what you will tell participants to do if they should experience any problems (e.g. who they can contact for help). You may also need to consider risk assessment issues.

Fast-Track Ethical Approval Form ver. 3.0 (Dec 2015) Page 1 of 4

Figure 3: Ethics Form – Fast Track Sample

- Appendix C: Log Sheets (3 log sheets)
  - Students need to include screenshots of the 3 meeting log sheets.
  - These log sheets need to be used by the student to document the meeting with the supervisor on regards of the project's progress.
  - It is the responsibility of the student that this logbook is kept up to date and that the student complies with the Supervisor's suggestions and recommendations as noted by the student in the logbook and approved be signed by the Supervisor.
  - Students **MUST** make a regular meeting with a supervisor with a **minimum** number of meetings are **3 meetings** per semester.
  - This logbook has to be submitted together with the report as well as uploaded in the required link inside Moodle. Below are the examples of the project log sheet.

(APU: Serial Number)

PLS V1.0

Project Log Sheet – Supervisory Session

Notes on use of the project log sheet:

1. This log sheet is designed for meetings of more than 15 minutes duration, of which there must be at minimum SIX (6) during the course of the project (SIX mandatory supervisory sessions).
2. The student should prepare for the supervisory sessions by deciding which question(s) he or she needs to ask the supervisor and what progress has been made (if any) since the last session, and noting these in the relevant sections of the form, effectively forming an agenda for the session.
3. A log sheet is to be brought by the STUDENT to each supervisory session.
4. The actions by the student (and, perhaps the supervisor), which should be carried out before the next session should be noted briefly in the relevant section of the form.
5. The student should leave a copy (after the session) of the Project Log Sheet with the supervisor and to the administrator at the academic counter. A copy is retained by the student to be filed in the project file.
6. It is recommended that students bring along log sheets of previous meetings together with the project file during each supervisory session.
7. The log sheet is an important deliverable for the project and an important record of a student's organisation and learning experience. The student **must** hand in the log sheets as an appendix of the final year documentation, with sheets dated and numbered consecutively.

Student's name: Rebecca Lee Hui Yi **Date:** 14/07/2023 **Meeting No: 6**

Project title: Lixandria: An OCR Driven Approach to Personal Book Catalogue Application
Intake: APD3F2211CS(IS)

Supervisor's name: Rizawati Rohizan **Supervisor's signature:**

Items for discussion (noted by student before mandatory supervisory meeting):

1. Demonstration of Lixandria mobile application
2. Feedback on completed FYP Final Documentation
3. Feedback on FYP Poster
4. How to arrange for FYP Presentation

Record of discussion (noted by student during mandatory supervisory meeting):

1. System looks good.
2. No issues with the documentation.
3. Move the student's details to the header and refine the Conclusion.
4. Within 3 weeks after submission, email the supervisor and second marker with available times.

Action List (to be attempted or completed by student by the next mandatory supervisory meeting):

1. Submission of FYP documentation and source code.
2. Schedule the FYP presentation.

Note: A student should make an appointment to meet his or her supervisor (via the consultation system) at least ONE (1) week prior to a mandatory supervisor session – please see document on project timelines. In the event a supervisor could not be booked for consultation, the project manager should be informed ONE (1) week prior to the session so that a meeting can be subsequently arranged.

Project Log Sheet

Figure 4: Project Log Sheet Sample

- Appendix D: Gantt Chart
  - Students should include the timeline of the semester in completing Project Part 1 (IR).

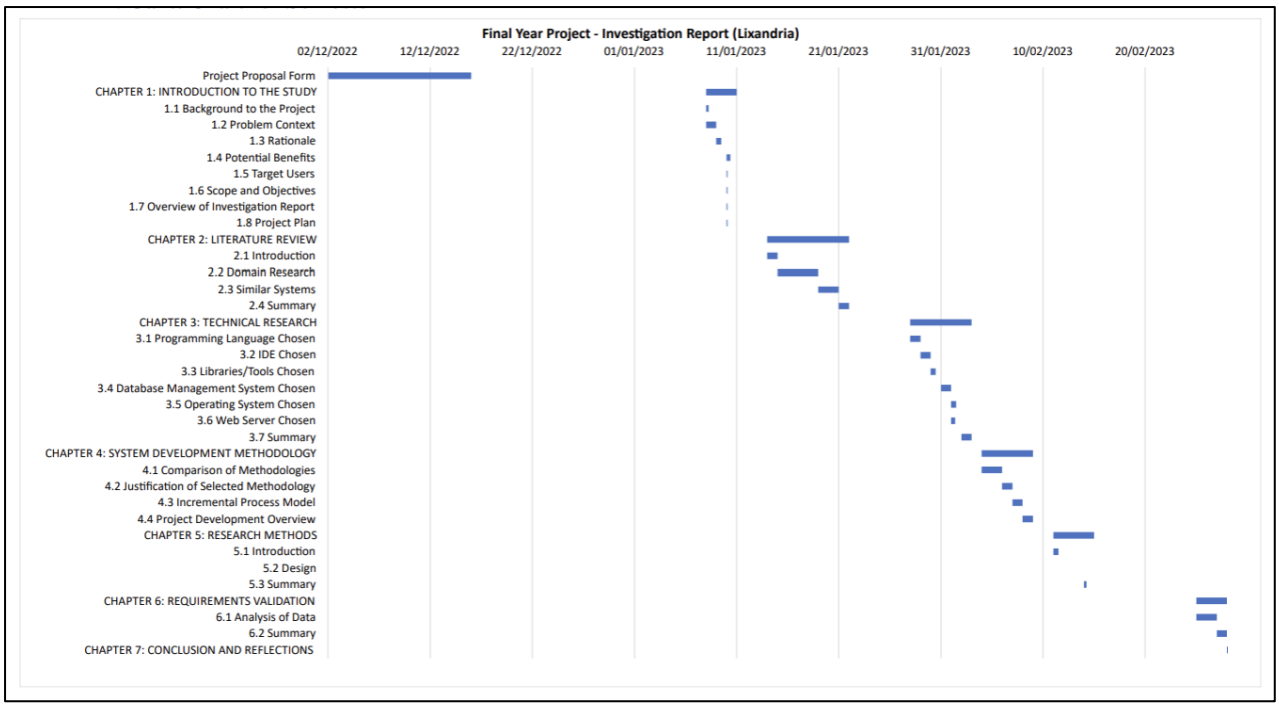

Figure 5: Gantt Chart Sample

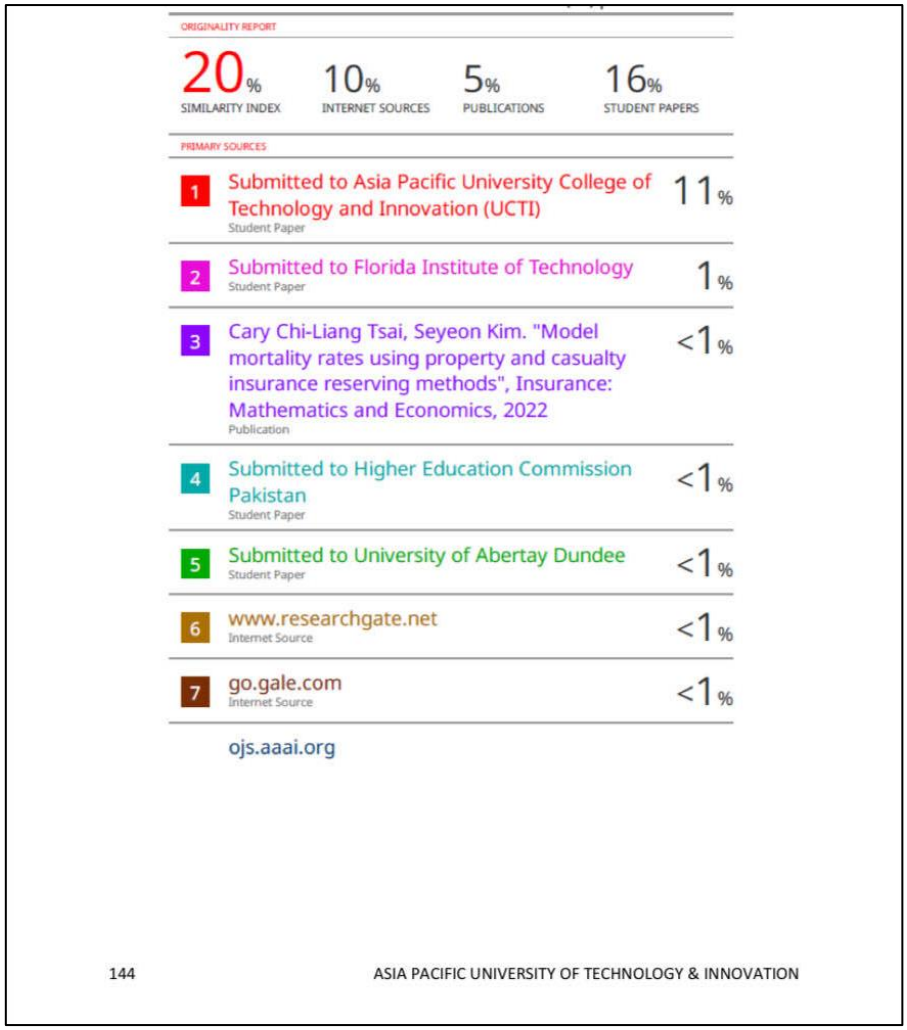

- Appendix E: Respondent Demographic Profile
  - This section provides information about the respondents (participants) who participate in the data collection process/survey or interview.
  - Note: This section is optional for CSDA students as CSDA students are not mandatory to conduct survey/interview.

Participant	**Gender**	**Age**	**Occupation**
Joanne	Female	30 - 45	Admin
Simon	Male	25 - 30	Unemployed
John	Male	30 - 45	IT Executive
Jacqueline	Female	45 - 54	Programmer
Maria	Female	30 - 45	Housewife
etc			
etc			

Note: the name of the participant can be a pseudonym and not the actual name to protect the confidentiality

Table 5: Respondents Demographic Profile Example

- Appendix F: **Turnitin Similarity Report**
  - First two (2) pages of Turnitin report (ensure the maximum Turnitin similarity 20%)
